

Urinal Cube

Urinals Troughs

(descalant, uric scale, carbonate scale, malodour)

Overview

Solid biological product to control scale build-up, flooding and malodour from urinals

Technical Description

Rumexo Urinal Cubes contains a high count of bacteria selected for their ability to rapidly degrade or assimilate volatile malodour causing molecules in urine and urine breakdown products. Such materials include sulphur (egg/vegetable) and nitrogen (ammonia) containing organic molecules and volatile fatty acids.

The selected bacteria are also capable of transforming uric acid to make it more soluble in water so that it deposits more slowly and washes through the pipework more readily. This helps control blockages and flooding (with malodour to follow).

To add uric and carbonate scale control the formulation includes a biochemical scale control agent and readily biodegradable cleaners to facilitate soil and debris removal.

Rumexo Urinal Cubes are presented in a characteristic blue colour and ocean breeze fragrance.

Application/Directions for Use

Cubes are placed approx 50cm apart in trough, or singly in urinals. During this time flushing may be reduced (for example, from continuous to 1-2 times/day) and blockages occur less frequently, both contributing to cost savings. Replace cubes when they have reduced in size by about 90% or lost their colour or fragrance. During 'normal' use each cube will last for 30-60 days.

Advantages

<p>Features</p>	<ul style="list-style-type: none"> • Convenient puck shape and size • Characteristic blue colour and persistent fragrance • Contains bacteria capable of breaking down urine wastes. • High bacterial count • Contains a biochemical scale prevention material • Readily biodegradable formulation • Does not contain PDCB or other harmful chemical or biocides
<p>Benefits</p>	<ul style="list-style-type: none"> • Simple to use • Reduced or prevents blockages and floods • Controls malodour • Compatible with all types of sanitary ware • No retrofitting or requirement for a dispenser/sleeve/cartridge • Long lasting • Cost effective

Packaging

50 x 30g Urinal Cubes /pail

Storage and handling

- Store in a dry place at room temperature.
- Avoid excessive inhalation.
- Avoid eye contact.
- Wash hands thoroughly with warm, soapy water after handling.
